

Heskins Glow In The Dark tapes are highly photoluminescent and allow clear marking of exits and hazards when the lights go out.

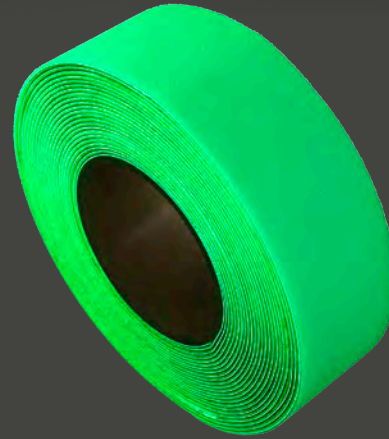

Premium – 3452 and Super – 3454

Glow In The Dark

Anti Slip and Egress tapes

- **Non abrasive Anti Slip surface**
- **Does not harbor bacteria**
- **Can be used in hospitals and clean rooms**
- **Improves direction finding in lights-off situations**
- **Easy to apply and clean**
- **Meets DIN, ASTM and OSHA requirements**
- **Egress tapes and Anti Slip tapes have identical photoluminescent qualities**

Under normal lighting conditions, Glow In The Dark tapes appear a pale green, and in a lights out condition they glow a bright green.

Egress tapes

8152 Glow In The Dark Egress marking tape - Premium

8154 Glow In The Dark Egress marking tape - Super

Glow In The Dark Egress tapes have a smooth, easy to clean surface and are suitable for application on most firm surfaces.

Apply Glow In The Dark Egress tapes to:

Base boards, entrance/exit ways, stair nosing and handrails.

Anti-Slip tapes

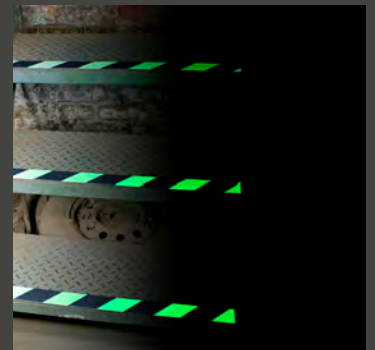

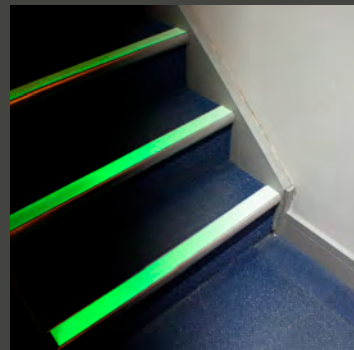

3452 Glow In The Dark Anti Slip Tape - Premium

3454 Glow In The Dark Anti Slip Tape - Super

Glow In The Dark Anti-Slip tapes have a coarse resilient anti slip surface and are suitable for application in areas of heavy foot traffic.

Apply Glow In The Dark Anti Slip tapes to:

Stair nosings, walkways, stairways.

When the lights go out in an emergency - there's still an obligation to mark exits and hazards.

Heskins Glow In The Dark tapes are highly photoluminescent and allow clear marking of exits and hazards in these types of situations.

HESKINS

ANTI-SLIP SOLUTIONS

How it works

Glow In The Dark tape is charged by absorbing artificial or natural light. After around 2 hours of exposure to a suitable light source the tape emits a photoluminescent glow that can help personnel identify key features along an exit route.

Under normal lighting photoluminescent tapes will appear a mild green and in darkness they will be white.

The Glow In The Dark materials used to manufacture our products are non-toxic, and free from any phosphorous or radioactive material.

Super or Premium?

We offer two grades of Glow In The Dark tape. The difference in grade is due to the type and amount of photoluminescent material used.

Premium Grade uses a larger amount of the material resulting in greater brightness over a given time, but at a higher cost.

Anti Slip tape with Glow In The Dark inset is ideal for stair nosings

Dual Purpose Anti Slip Tiles with both Reflective Hazard tape and Glow In The Dark tape

Solid Glow In The Dark tape and Glow In The Dark Hazard tape

Glow In The Dark signs for escape routes
